EZ GUARD® is constructed from the same high quality materials as our EZ WIRE® partition. It is designed for machine guarding and as a safety barrier over mezzanines. Use EZ GUARD® to enclose one machine, a work cell, or an entire line.

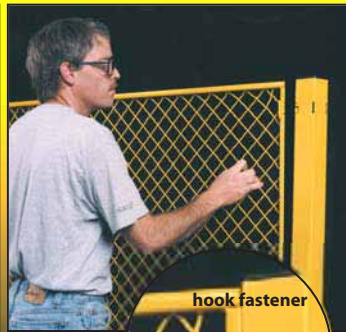

Standard and special configurations are available. Doors can be set up to interlock with your equipment. Consult the factory for expert assistance in designing your EZ GUARD® solution to OSHA compliance.

## PROTECT MACHINERY AND PERSONNEL IN SECONDS

1

The overall post height is 6'. Lag bolts and plastic end caps are included. Posts are universal and can be used in any position (corners or line posts.)

2

Panels are attached to the outside surface using the patented hook fastener with no exposed wires.

3

Panels are positioned on the posts with a 12" sweep space.

4

EZ GUARD® Panels are secured using self-tapping screws and maybe installed with power tools.

- EZ GUARD® uses the patented hook-fastener design
- Allows easy-on and easy-off panels for maintenance and access
- Machine screws are used for more permanent applications
- Standard color is safety yellow
- Ideal for enclosing robotic and other automated machinery
- 10-gauge wire, 1 1/2" diamond mesh pattern
